**DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE**

Milestone No. ---(153) marks a point on Mason and Dixon's West Line about 2550 feet west of the preceding monument and mound, No. ---(152), close to 145 horizontal miles west of the northeast corner of Maryland, the beginning of their 230.228-mile West Line. It is one of the <sup>new</sup> Cockeysville marble monuments added to the Line in 1902 during the course of the 1900-03 Resurvey of the Maryland-Pennsylvania boundary; is in good condition, unaltered, measures about 10 inches square and stands about 1 foot above ground.

The area here is <sup>high, very</sup> remote, heavily forested ridge of Polish Mountain, with the elevation at the site of 1484 feet. The site is within Election District 3 of Allegany County, MD, and Southampton Township of Bedford County, PA; about 2¼ miles north of the small scattered settlement of Pratt, MD; on the east edge of the ridge at a point about 50 feet east of Stuckey Road/Polish Mountain Road and about 15 feet into the woods south of the pipeline. It cannot be seen from any main road, but though inconspicuous is easily seen from the ridge and pipeline, all seasons; and is protected by its site and remoteness.

The monument, as with all the 1902 monuments set west of Sideling Hill except for the replica crownstone No. ---(169) in Ellerslie, is a dressed magnesian limestone post with a low pyramidal top; was quarried and carved in Cockeysville, MD; measured about 10 inches square; was about 4½ feet long, cut to stand about 1½ feet high with about 3 feet for setting into the ground. The only embellishments are the blocky capital letters P on the north side facing Pennsylvania and M on the south side facing Maryland, V-sunk without serifs, with the year of the preliminary Mason and Dixon survey of the area (1766) on the east side and the year set by the 1900-03 Resurvey (1902) on the west side, all horizontally-aligned as a band near the top. The letters and dates are clear and intact, as are the planes and apex of the top except for small chips at all top corners and along all vertical edges. The stone still measures about 10 inches square, but <sup>now</sup> stands only about 1 foot above ground. There is some weathering of the top and a sprinkling of lichen; and the south side has a noticeably florid grain, characteristic of this marble.

(see Thematic Group National Register nomination form for full descriptions of the several kinds of new 1902 monuments erected by the 1900-03 Resurvey and the method of setting them)

**STATEMENT OF SIGNIFICANCE**

Milestone No. ---(153) is significant on the national and state levels primarily as one of the some 248 markers still visually defining Mason and Dixon's West Line, the 230.228-mile boundary later known as the Mason-Dixon Line, famous for its historical impact and innovative survey methods. This section of the West Line was preliminarily surveyed in 1766, marked with cairns and additional wood posts the following year; and this new site/established on the Line/and monumented in 1902 with a new Cockeysville marble marker during the 1900-03 Resurvey of the Maryland-Pennsylvania boundary. Locally, as one of 37 markers along the present Allegany/Fulton-Bedford-Somerset county boundary, No. ---(153) is also significant for its identifiable relationship to the colonial and Civil War heritage of these counties.
